**Satellite Meteorology Training in WMO RA V during 2022/20223: The
Australian VLab Centre of Excellence experience**

Bodo Zeschke

BMTC

This presentation summarizes the satellite meteorology training conducted by the Australian VLab Centre of Excellence over the past year. It will focus on the monthly Regional Focus Group meetings as well as collaboration with other Centres of Excellence within the context of the WMO Global Campus. Relevant topics include dissemination of the latest developments in effectively utilizing regional geostationary satellite data and polar orbiting satellite data and associated resources within WMO RA V and adjacent regions.
